Acknowledgment Records

Because the acknowledgment (ACK) may come to the participant in many distinct manners depending upon the brand of software being used, the file structure of the ACK Key Record and ACK Error Record (ACKR) are included in the handbook. The ACKR Record tells which line on which form is causing the error, and the error code that describes what is wrong.

Every transmission will be acknowledged by the return of an acknowledgment file (ACK file) to the transmitter. This ACK file will consist of the following:

TRANA and TRANB records as originally sent by the transmitter;
an Acknowledgment record set for each recognizable return transmitted; and
an original RECAP Record with counts of accepted, rejected, and duplicate returns added

The ACK file will be available to be picked up by the transmitter within 24 hours from receipt of returns by the department.

The acknowledgment of an individual return will be an ACK record set. An ACK record set will always have one ACK key record and up to 96 ACK error records associated with it. The ACK key record will contain all of the identifying information for the return it represents, plus a field to indicate how many (if any) ACK error records follow.

The ACK error record set will contain information that will disclose errors by Error Form Record ID, Error Form Record Type, Error Form Page Number, Error Form Occurrence Number, for multiple occurrences of Schedules or Forms, Error Field Sequence Number and the Error Reject Code describing the specific error.

Acceptance Codes:

- “A” The return was accepted by the Electronic Filing System (EFS), and from that point will be processed in the same manner as if the return had been mailed. This in no way implies the return is correct, only that it is processable to the EFS.
- “R” The return was rejected for a fatal error. This does not qualify as a filed return.
- “D” The return is a duplicate. An electronic return has been previously filed and accepted in the Illinois Electronic Filing Program this processing year. This does not qualify as a filed return.
- “T” The entire transmission was rejected.
- “E” ~~The Federal return was accepted as an imperfect return.~~ **Exception Processing** - A credit for tax paid to other states was claimed on IL-1040, Line 19 of this return. You must fax copies of the out-of-state returns that support the Line 19 credit amount to us at 217-782-3879 within 10 days of this notice. If you do not submit the necessary returns on time or if you submit the returns and we discover an error, we will adjust the Line 19 amount and issue an ITR-76, Taxpayer Notification.

Acknowledgment Records

Duplicate Codes

“D” The DCN is a duplicate or zero, the return was rejected.

“P” The Primary SSN is a duplicate or zero, the return was rejected.

“S” The Secondary SSN is a duplicate or zero, the return was rejected.

When the transmitter calls, the Acknowledgment file is sent before any returns can be transmitted to the Illinois Department of Revenue. If there is no ACK file to send to the transmitter, a dummy ACK file will be sent. If the transmitter has no returns to transmit, the ACK files may be picked up and the transmission session ended at that point.

We support file transmissions by HTTPS file transmission protocol. Files are transferred to and from our Gateway server via the Internet using Secure Socket Layer (SSL) technology. See IL-1346 for more information.
